MARS.

Some Curious Points About His Moons.
 H. H. Parkhurst in the New York Herald.

There are some curious circumstances with reference to the newly discovered satellites of Mars which have not yet been published, arising from the shortness of their periods of revolution. The outer satellite revolves in thirty hours and fourteen minutes. While Mars is revolving upon its axis once, this moon goes about three-fourths of the way round, so that if it rose with the sun this morning, to-morrow morning it would have only heread the meridian, and would not set until the next morning, when it would remain for two days below the horizon; so that it would be four days less forty two minutes, before the satellite would rise again. But it goes through all its phases—new moon, full moon, last quarter and new moon again—every thirty-two hours, or three times during one diurnal revolution. Rising with the sun, as a new moon, this morning at 6 o'clock, it would be full moon at 10, p. m., before it reached the meridian; new moon again at 2, p. m., to-morrow, soon after passing the meridian, and full moon again when it set at 6 o'clock the next morning.

The inner satellite revolves in seven hours thirty-eight minutes, equivalent to eight hours and six minutes, Martial time. This is nearly three times as fast as the planet itself revolves on its axis, so that the diurnal motion of this satellite is towards the east, rising in the west and setting in the east. If it met the sun on the meridian to-day, it would set in the east, pass around the planet, rise in the west and again reach the meridian thirteen minutes after midnight, and, passing entirely around a second time reach the meridian at twenty-six minutes after noon. During this time it would have passed through all its phases three times. Although Mars has two moons, and perhaps three, it is not a moon like ours, following the sun and stars in the diurnal motion and changing in form and position but little at each revolution. Their changes resemble those of the insects which live but a day, and their apparent motion is in the one case so slow as to be almost at rest in the heavens like a beacon light, and in the other in a direction contrary to that of the sun and stars, and contrary to all experience of celestial motion.

The Fence Law in Mecklenburg.

The editor of the Carolina Spartan has been over to Charlotte to see how the no-fence law works in Mecklenburg. He says: "We talked with white and black, landlord and landless, and all acknowledged that when the contracts of another year are made, every inconvenience will be arranged, and every one satisfied with the justice and fairness of the new law. Among the results, or effects of the new law, we may mention that all of the vacant lands around the town have been put under cultivation and made to produce fine crops; dairy farms have been established, and milk and butter can be purchased for less than it takes to feed a cow, (milk is now selling at 25 cents per gallon); permanent pastures have been established around the town in which cows can be pastured at reasonable rates; and besides, since the stock have been enclosed, vegetation is more luxuriant and a cow tied out to a stake with a long rope can easily pick enough grass to keep her in good condition, at this season, without feeding. The farms and fields that were under fence remain so, but all around Charlotte, fields are to be found without a fence; and there is a small patch of corn on Main Street, near the centre of the town without a fence, which remains untouched by man or beast; and in a few years we expect to see her beautiful yards and lawns unprotected by anything save hedges, or very light ornamental fences. Our observations and inquiries in Mecklenburg only serve to strengthen the conviction long felt, that the stock law is exactly what is needed to put

TO OUR CUSTOMERS

WHO are indebted to us for PROVISIONS or PHOSPHATES, we would respectfully call attention, that your bills are due on or before the first of November. We re depending on you for payment AT ONCE, to enable us to meet obligation made to assist you, and which are due at that time.

Merchant Tailoring.

THE undersigned informs the citizens of Winnsboro and the county generally, that he has opened a Tailoring Establishment in the store next to Mr. J. Clonding's. He is prepared to do all kinds of work in his line at short notice and on reasonable terms. A full line of samples kept constantly on hand, from which customers may make selections. Special attention given to CUTTING.

This standard article is compounded with the greatest care.

Its effects are as wonderful and as satisfactory as ever.

It restores gray or faded hair to its youthful color.

It removes all eruptions, itching and dandruff. It gives the head a cooling, soothing sensation of great comfort, and the scalp by its use becomes white and clean.

By its tonic properties it restores the capillary glands to their normal vigor, preventing baldness, and making the hair grow thick and strong.

As a dressing, nothing has been found so effectual or desirable.

A. A. Hayes, M. D., State Assayer of Massachusetts, says, "The constituents are pure, and carefully selected for excellent quality; and I consider it the BEST PREPARATION for its intended purposes."

Price, One Dollar.

Buckingham's Dye FOR THE WHISKERS.

This elegant preparation may be relied on to change the color of the beard from gray or any other undesirable shade, to brown or black, at discretion. It is easily applied, being in one preparation, and quickly and effectually produces a permanent color, which will neither rub nor wash off.

Manufactured by R. P. HALL & CO., NASHUA, N. H. Sold by all Druggists, and Dealers in Medicines.

A case of Liver disease, 11 years standing, cured by the use of Simmons' Hepatic Compound.

Gentlemen:—I think it the duty of everybody that can render assistance to the afflicted to do so, therefore I take great pleasure in testifying from my own knowledge to the great efficacy of your Simmons' Hepatic Compound. I commenced using it in my family in a case of Liver disease of 11 years standing, which it has entirely cured. Its wonderful effects in the immediate cure of Sick-headache, dyspepsia and chills and fevers, I am glad to say, has been fully realized in my family from the use of a few bottles of this medicine. My wife has been subject to severe spells of headache for more than two years, and has been entirely cured by using a few bottles of Simmons' Hepatic Compound and has determined to keep it always in our house. We consider it an invaluable family medicine.

Yours truly,

ROBERT E. WELCH.
